

SHIVAM TIWARI

Backend Developer | Java & Spring Boot

+91-9082895474 | shivamtiwari01016@gmail.com | github.com/shivamtiwari01016 | linkedin.com/in/shivam-tiwari-dev01

PROFESSIONAL SUMMARY

Final-year Computer Engineering student and backend-focused Full-Stack Developer specializing in Java, Spring Boot, and scalable RESTful API design. Experienced in building AI-integrated applications, database-driven systems, and responsive web interfaces. Comfortable working across the stack with React on the frontend, and expanding into Python for backend and scripting work. Strong foundation in Data Structures and Algorithms with a focus on writing efficient, maintainable, and well-architected code.

TECHNICAL SKILLS

Languages: Java (Core Java, Java 8+), Python, JavaScript, SQL

Frontend: HTML5, CSS3, React (Vite)

Backend: Spring Boot, Spring MVC, Spring Data JPA, REST APIs, JDBC, WebClient

Databases: MySQL

Tools & Platforms: Git, GitHub, IntelliJ IDEA, VS Code, Maven, Postman

Core Competencies: Data Structures & Algorithms, OOP, REST Architecture, System Design Basics, Multithreading (Basics)

PROJECTS

AI Email Reply Assistant — Chrome Extension + Web App

Java 21, Spring Boot, React (MUI, Axios), REST APIs, WebClient, Google Gemini API

- Developed and launched a dual-mode AI email drafting system (Chrome Extension + React Web App), eliminating an estimated ~3 hours of manual email-drafting time per week for users.
- Engineered asynchronous Gemini API integration using Spring WebClient, reducing AI response generation time by 25% and enhancing real-time user feedback capabilities.
- Designed the extension to detect Gmail's compose window via MutationObserver, inject an "AI Reply" button, and auto-insert Gemini-generated replies — eliminating tab-switching between Gmail and AI tools.
- Implemented tone-controlled generation (Professional, Casual, Friendly) in the React UI, with copy-to-clipboard and dark/light mode support.

Journey Junkies — Travel Platform

Java, MySQL, HTML5, CSS3, JavaScript

- Developed an interactive web platform showcasing affordable travel options, incorporating a comprehensive FAQ section and live chat functionality to improve customer inquiry response time.
- Implemented backend logic using Java with MySQL database integration.
- Designed responsive frontend interfaces and integrated AI-based personalized recommendations.

ACHIEVEMENTS

INNOSPARK Ideathon 2025 — Finalist

Competitive Programming — Solved 50+ problems on [LeetCode](https://leetcode.com) (22 Easy, 21 Medium, 10 Hard); 33-day active streak

EDUCATION

Lokmanya Tilak College of Engineering Mumbai, India

Bachelor of Engineering in Computer Engineering 2023 – 2027 | CGPA: 9.03

K.V. Pendharkar College Mumbai, India

Higher Secondary Education 2021 – 2023

R.B.T Vidyalaya Mumbai, India

Secondary Education 2019 – 2021
